VR AND SPORTS

Sport Vlaanderen has the ambition to get as many people moving and doing sports, in high-end quality environments and preferably for a lifetime. People are getting to know more and more about AR and VR surroundings and testing, the e-coach or digicoach or an online community-platform. As sport agency of the Flemish Government they want to adapt and jump on board of these extremely fast changing situations. In 2018 Sport Vlaanderen opened the first VR-sportscube in Flanders in the sportinnovation campus in Brugge, together in cooperation with R.A.V.E.N. and Howest.
